Presidents of War

Michael Beschloss

Ten years in the research and writing, *Presidents of War* is a fresh, magisterial, intimate look at a procession of American leaders as they took the nation into conflict and mobilized their country for victory.

"*Presidents of War* . . . looks at leadership from every angle: communication, the critical relationship with Congress, the treatment of civil liberties and the role of the (often formidable) presidential spouse."

—Lionel Barber, *Financial Times*

The Poison Squad

One Chemist's Single-Minded Crusade for Food Safety at the Turn of the Twentieth Century

Deborah Blum

In the late 1800s, unregulated food manufacturers knowingly sold lethal products, like "milk" containing formaldehyde. Deborah Blum tells the story of the scientists, led by Dr. Harvey Washington Wiley, who fought for food safety and consumer protection.

"The Pure Food and Drug Act of 1906 ended a century of scandal and bitter political maneuvering, with major impetus from Harvey Washington Wiley, a genuinely unknown American hero. Pulitzer Prize-winning journalist Blum offers a vivid account of Wiley's achievements." —*Kirkus*

A Queer History of the United States

Michael Bronski

A Queer History of the United States is more than a "who's who" of queer history: it radically challenges how we understand American history. Drawing upon primary-source documents, literature, and cultural histories, scholar and activist Michael Bronski charts the breadth of lesbian, gay, bisexual, and transgender history, from 1492 to the 1990s.

"Bronski demonstrates with wit, insight, and impeccable scholarship that queer lives are, and always have been, woven into the very fabric of this country." —Alison Bechdel, author of *Fun Home*

A Queer History of the United States for Young People

Michael Bronski; Adapted by Richie Chevat

It is crucial for lesbian, gay, bisexual, transgender, and queer youth to know their history. *A Queer History of the United States for Young People* demonstrates that LGBTQ people have long been vital to shaping our understanding of what America is today. With over 60 illustrations and photos, a glossary, and a corresponding curriculum, *A Queer History of the United States for Young People* will be vital for teachers who want to introduce a new perspective to America's story.

The War Before the War

Fugitive Slaves and the Struggle for America's Soul from the Revolution to the Civil War

Andrew Delbanco

Andrew Delbanco tells how fugitive slaves both forced northerners to confront the true nature of slavery and enraged southerners who demanded the return of their human "property," a conflict that ultimately led to civil war.

"[Delbanco] transforms the figure of the fugitive slave from the margins of American history to its dynamic center...This delightfully readable book is thronged with stories of heroes whose flights from bondage helped to revolutionize [this] country."

All the Real Indians Died Off

And 20 Other Myths About Native Americans

Roxanne Dunbar-Ortiz and Dina Gilio-Whitaker

In this enlightening book, scholars Roxanne Dunbar-Ortiz and Dina Gilio-Whitaker tackle myths about Native American culture and history that have misinformed generations. Tracing how these ideas evolved, and drawing from history, the authors disrupt long-held and enduring myths such as: "Columbus discovered America." Each chapter shows how these myths are rooted in the fears and prejudice of European settlers and in the larger political agendas of a settler state aimed at acquiring Indigenous land and tied to narratives of erasure and disappearance.

An Indigenous Peoples' History of the United States

Roxanne Dunbar-Ortiz

Spanning over three hundred years of history, *An Indigenous Peoples' History of the United States* is a comprehensive history that significantly reframes how we view U.S. history. Dunbar-Ortiz challenges the founding myth of the United States and shows how policy against the Indigenous peoples was genocidal and imperialist, and designed to crush the original inhabitants. Told from the viewpoint of the Indigenous, this book reveals how Native Americans for centuries actively resisted expansion of the U.S. empire.

The World in a Grain

The Story of Sand and How It Transformed Civilization

Vince Beiser

After water and air, sand is the natural resource that we consume more than any other—even more than oil. Every concrete building and paved road, every computer screen and silicon chip is made from sand. And we're running out of it.

"Sand shortage? Black market in sand? Secret sand heists? Who knew? Vince Beiser shows that this key component of our fragile, over-consuming planet we need to better understand, conserve and protect."

We Were Eight Years in Power

An American Tragedy
Ta-Nehisi Coates

“We were eight years in power” was the lament of Reconstruction-era black politicians as the American experiment in multiracial democracy ended with the return of white supremacist rule in the South. In this sweeping collection of new and selected essays, Ta-Nehisi Coates explores the tragic echoes of that history in our own time: the unprecedented election of a black president followed by a vicious backlash that fueled the election of the man Coates argues is America’s “first white president.”

Jon Meacham, Timothy Naftali, Peter Baker, Jeffrey A. Engel

Four experts on the American presidency examine the three times impeachment has been invoked—against Andrew Johnson, Richard Nixon, and Bill Clinton—and reveal the complicated motives behind each impeachment. Each case depended on factors beyond the president's behavior: his relationship with Congress, the polarization of the moment, and the power and resilience of the office itself. This is a realist view of impeachment that looks to history for clues about its potential use in the future.

The Penguin Book of Haiku

Translated with an Introduction by Adam Kern

Today, the haiku is renowned for its minimalism and brevity—usually running three lines in seventeen syllables—and by its use of natural imagery to make Zen-like observations about reality. In fact, the haiku is much more: it can be funny, crude and mischievous. This anthology of over 1,000 haiku offers an illuminating introduction to this widely celebrated, if misunderstood, art form.

No Matter

Poems

Jana Prikryl

Jana Prikryl's *No Matter* argues for the necessity of vision in a time of darkness. Set in cities toppling past the point of decline-and-fall—Rome, London, Dublin, and most of all New York—these poems capture the experience of being human in the late days of empire, when the laws protecting weak from strong are being torn away. Ranging from free verse through sonnets and invented forms, Prikryl's poems insist that every demolition also builds something new and unforeseen.

Jennifer L. Eberhardt, PhD

One of the world's leading experts on unconscious racial bias offers an examination of its influence on contemporary race relations and criminal justice.

"The hope for progress is greatly increased by Jennifer Eberhardt's groundbreaking new book on implicit bias. *Biased* presents the science of bias with rare insight and accessibility, but it is also a work with the power and craft to make us see why overcoming racial bias is so critical."

On Edge

A Journey Through Anxiety

Andrea Petersen

Andrea Petersen was first diagnosed with an anxiety disorder at the age of twenty. Although having a name for her condition was an enormous relief, it was only the beginning of a journey to understand and master it.

"[*On Edge*] combines an account of [Petersen's] personal experience with a description of up-to-the-minute research describing what we know about anxiety and its treatment."

—David H. Barlow, professor of psychology and
psychiatry emeritus, Boston University
